

WORLD ECONOMIC INDICATOR

**ANALYSIS ON HOW TO
SUSTAIN GDP/CAPITA.**

BY:-ABHIRAJ VISHWAKARMA

BUSINESS PROBLEM

Being a part of a Department under
**ECONOMIC CO-OPERATION AND DEVELOPMENT
ORGANISATION** our task is to bring out useful
insights from the given
WORLD ECONOMIC DATASET that
“How a country should sustain its **GDP/CAPITA**”
by focusing on features that either strongly or
weakly affects it.

SOLUTION

- 1).We are provided with ECONOMIC DATASET of 12 years of different countries in the world, containing different features over which a countries GDP depends.
- 2).This dataset contains large number of missing values and outliers that are handled in the best possible way according to my knowledge.
- 3).Some addon features are Engineered such as (GDP/CAPITA,TOTAL LIFE EXPECTANCY,ENERGY/CAPITA,CO2 EMISSION/CAPITA,TOURISM INBOUND/CAPITA,TOURISM OUTBOUND/CAPITA)in according to drive the analysis to a much more detailed Easy and Accurate direction in order to get Efficient results.
- 4).After all the Data arrangements and Data processing required we performed analysis using various Data analytics tools and techniques such as UNIVARIATE ANALYSIS and BIVARIATE ANALYSIS on features which play a vital role in the contribution to GDP/CAPITA of a Nation.

Key Features Used For Analysis.

**GDP DATASET
ENERGY
DATASET**

**HUMAN
RESOURCES
DATASET**

**TOURISM
DATASET**

**BUSINESS
DATASET**

***GDP/CAPITA
*HEALTH
EXP/CAPITA**

***BIRTH RATE
*INFANT MORTALITY RATE**

***TOURISM
INBOUND/CAPITA**

***BUSINESS TAX RATE
*DAYS TO START BUSINESS**

***LENDING INTEREST**

***POPULATION 0-14
*POPULATION 15-64
*POPULATION 65+**

***TOURISM
OUTBOUND/CAPITA**

***EASE OF BUSINESS
*HOURS TO DO TAX**

***ENERGY
USAGE/CAPITA**

***CO2
EMISSION/CAPITA**

***POPULATION URBAN
*TOTAL LIFE
EXPECTANCY**

***INTERNET USAGE
*MOBILE PHONE
USAGE**

DETAILED INSIGHTS

- 1).Countries like ASIA,EUROPE,OCEANIA are having more Average values for GDP/CAPITA among all the other countries which explains for there increased and improved GDP/CAPITA during 12 years.
- 2).The cause for increasing GDP is observed that countries who invest more percentage on HEALTH EXPENSES are likely to have more GDP, as Health exp/capita is directly related to GDP/capita.
- 3).Countries having high GDP/CAPITA are found to have a low BIRTH RATE, although this statement cannot be supported with full confidence but Birth rate affects GDP/CAPITA of a country.
- 4).Its observed that countries having low infant mortality rate are having increased GDP/CAPITA, which is due to increased investment on health expenditure eventually increases Total life expectancy Rate.
- 5).Countries having high GDP/CAPITA are having Heavy Energy usage which results in Increased CO2 Emission.

DETAILED INSIGHTS

6).Population 0-14 and 65+ do not contribute or affect much to the GDP/CAPITA as this age range cannot be considered as workforce for a nation and has low significance towards GDP/CAPITA.

7).Population of range 15-64 who are living in Urban areas are resulting in a much useful population for a country as they can be treated as active workforce and contribute greatly to GDP/CAPITA.

8).Countries having high GDP/CAPITA are tend to have high Tourism inbound/capita which in return increases Tourism outbound/capita.

9).Countries which are having high Business taxes are having GDP on the lower side due to which days to start business, hours to do taxes also increases due to which Business becomes tough and complicated.

10).Lastly it can be concluded that countries having high GDP/CAPITA are having High mobile phone usage and Internet usage but this statement cannot be supported confidentially and have lower significance.

ANALYSED RELATION OF FEATURES WITH GDP/CAPITA.

MAIN DATASET	POSITIVELY RELATED DATASETS	NEGATIVELY RELATED DATASETS	DATASETS WITH LESS SIGNIFICANCE
GDP/CAPITA	<ul style="list-style-type: none">*HEALTH EXP/CAPITA*ENERGY USAGE/CAPITA*CO2 EMISSION/CAPITA	<ul style="list-style-type: none">*LENDING INTEREST*BIRTH RATE*INFANT MORTALITY RATE	<ul style="list-style-type: none">*BIRTH RATE*POPULATION 0-14
	<ul style="list-style-type: none">*POPULATION 15-64*POPULATION 65+*POPULATION URBAN*TOTAL LIFE EXPECTANCY	<ul style="list-style-type: none">*POPULATION 0-14*BUSINESS TAX RATE*DAYS TO START BUSINESS	<ul style="list-style-type: none">*POPULATION 65+
	<ul style="list-style-type: none">*TOURISM INBOUND*TOURISM OUTBOUND*MOBIULE PHONE USAGE*INTERNET USAGE	<ul style="list-style-type: none">*EASE OF BUSINESS*HOURS TO DO TAX	<ul style="list-style-type: none">*INTERNET USAGE*MOBIULE PHONE USAGE

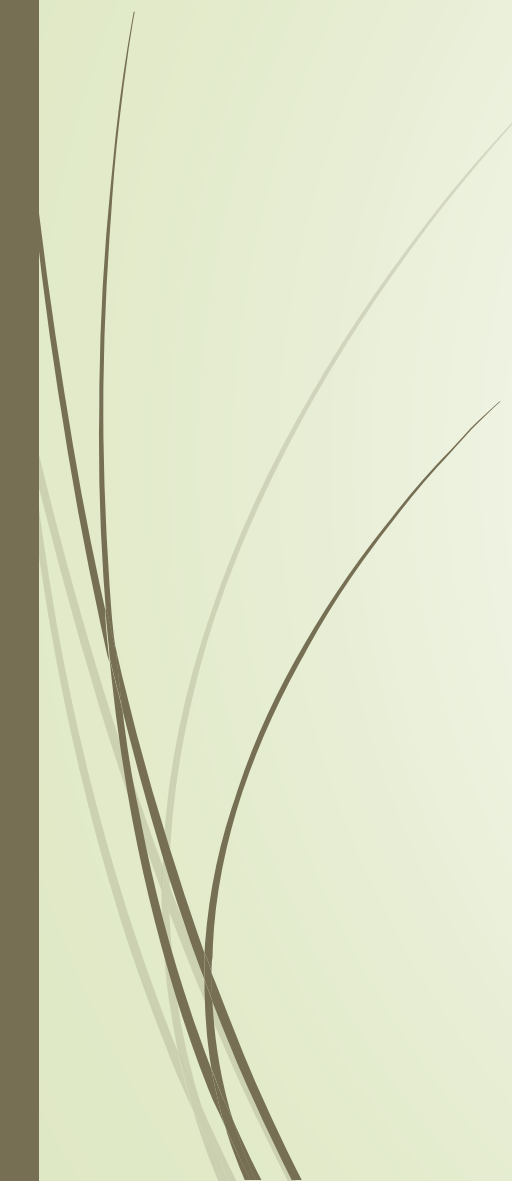

FINAL INSIGHTS

1).In order to Sustain **GDP/CAPITA**, a country should focus to increase its **Health exp/capita**, which increases its overall population which supports for a healthy workforce specially workforce of **population age group 15-64** who are living in **urban areas** contribute more to GDP/CAPITA to the nation.

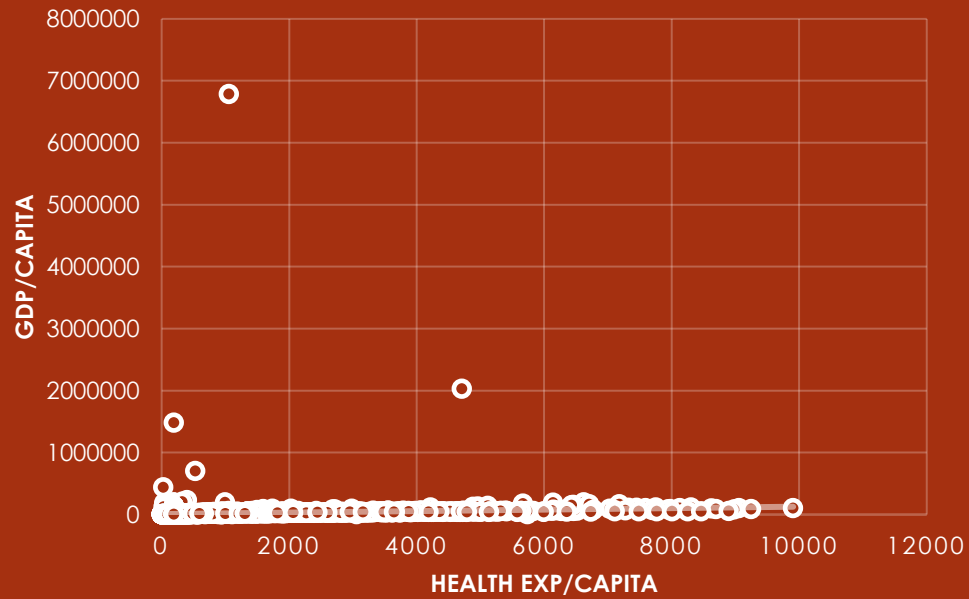

2).A country should focus on to invest in Business start-ups and entrepreneurships with less **Lending interest** and **Business taxes**.

3).A country should make an increment in the services provided and production so that **Tourism inbound** and **outbound** is maintained on a higher level.

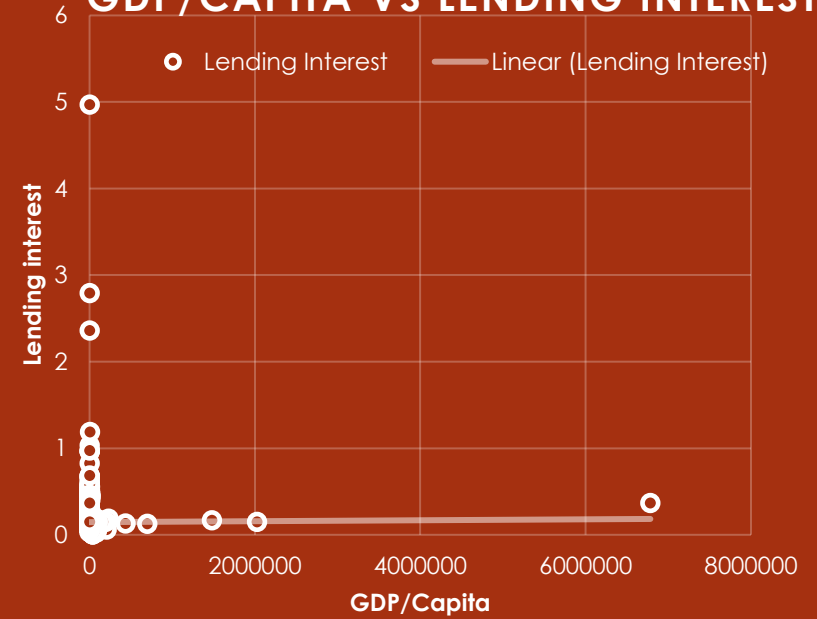

These are the main features that are needed to be focussed to attain a wealthy GDP for a country.

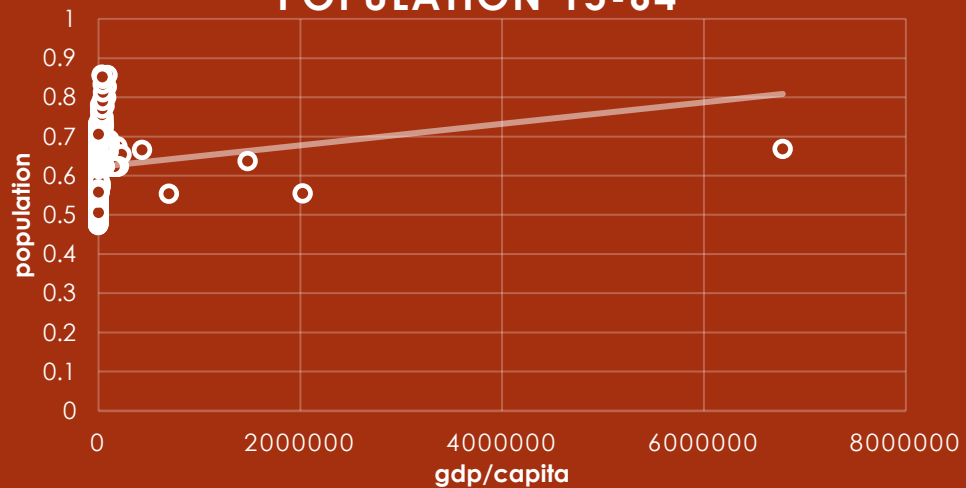

HEALTH EXP/CAPITA VS GDP/CAPITA

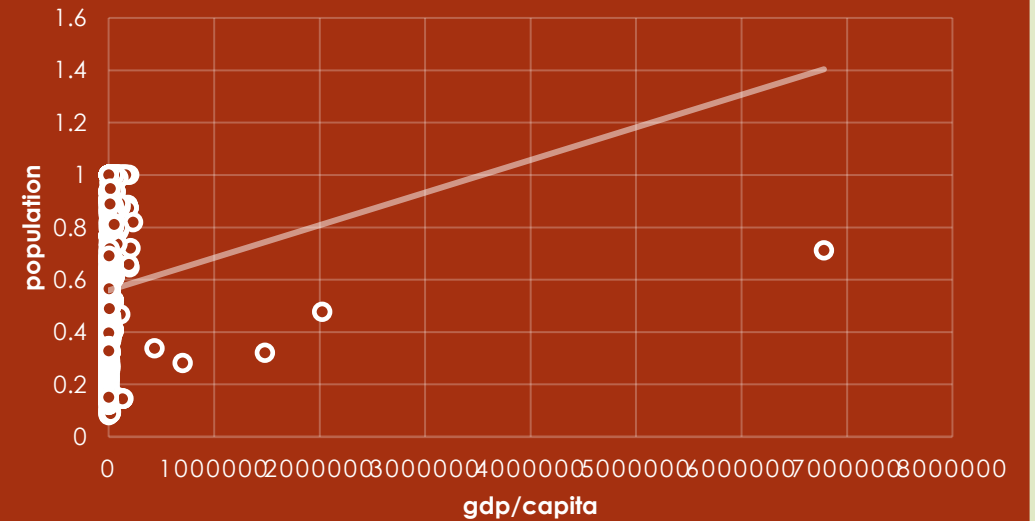

GDP/CAPITA VS LENDING INTEREST

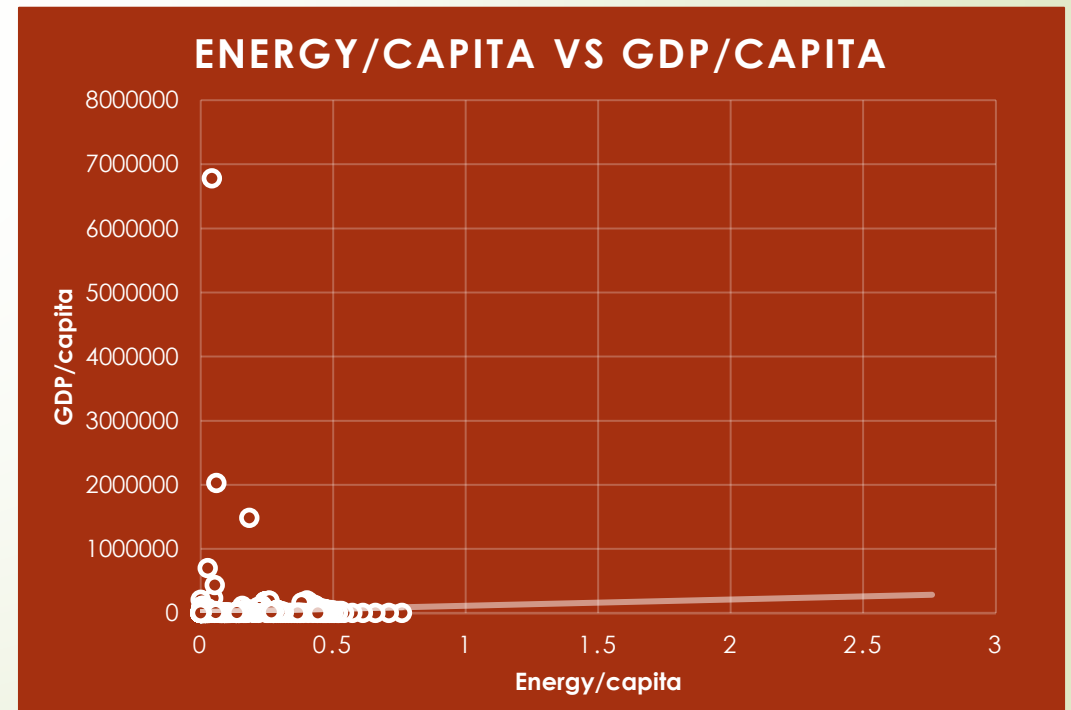

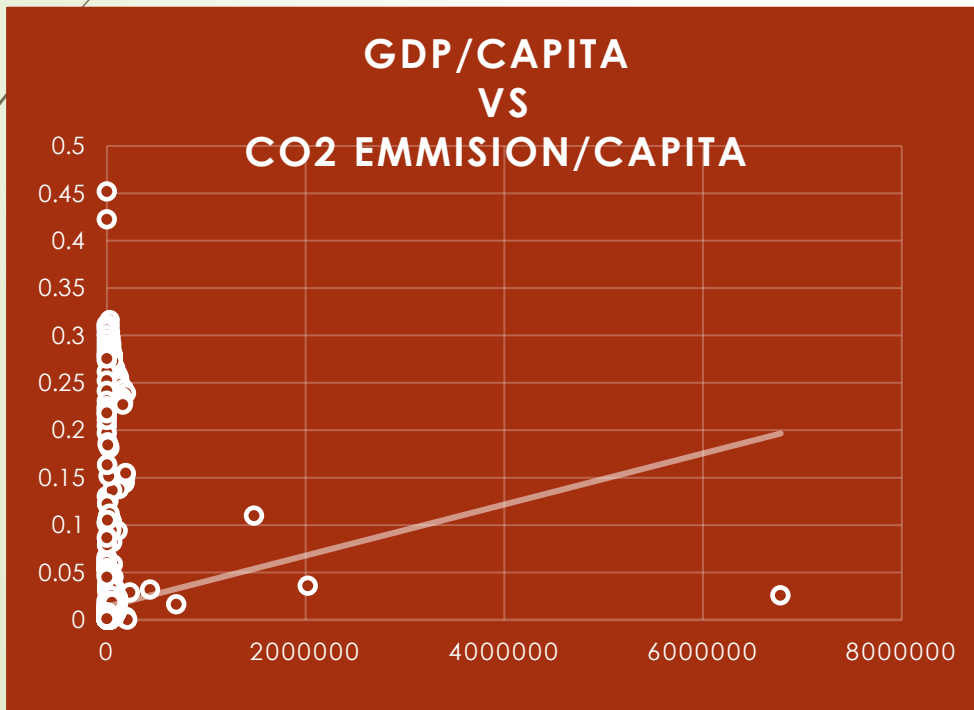

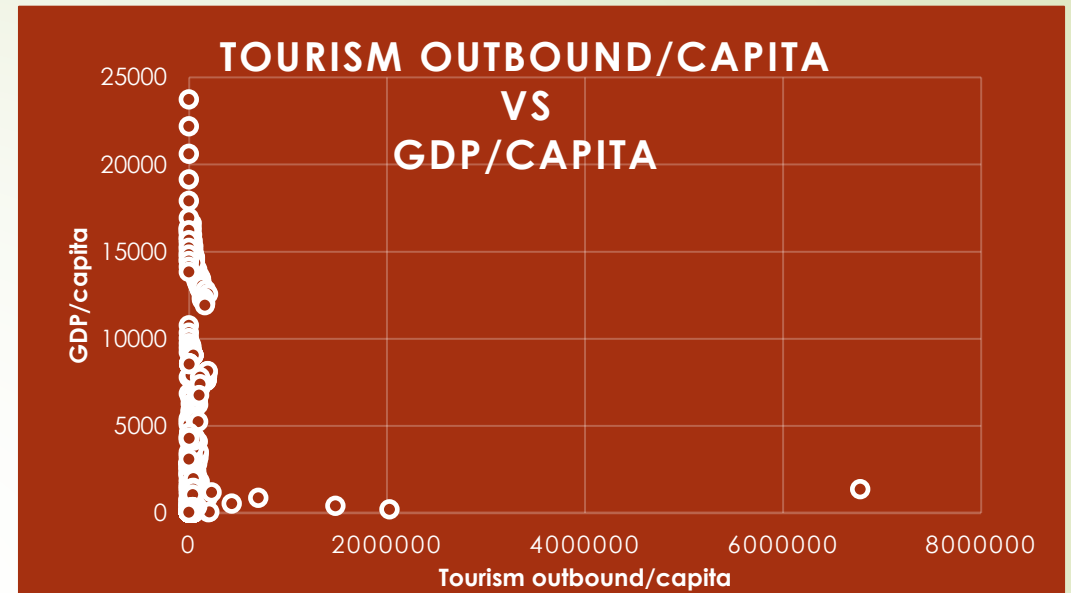

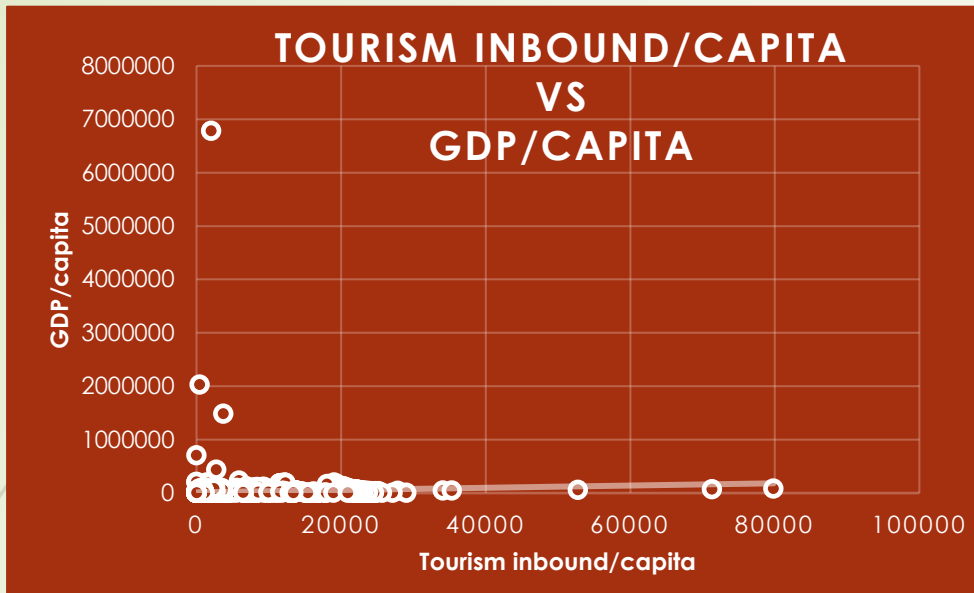

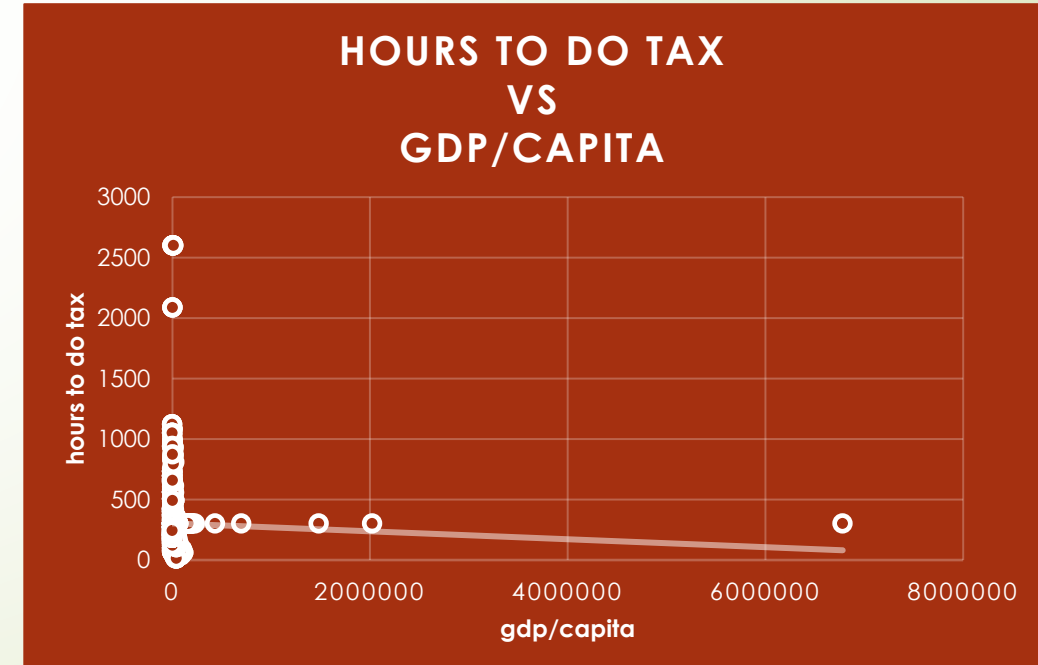

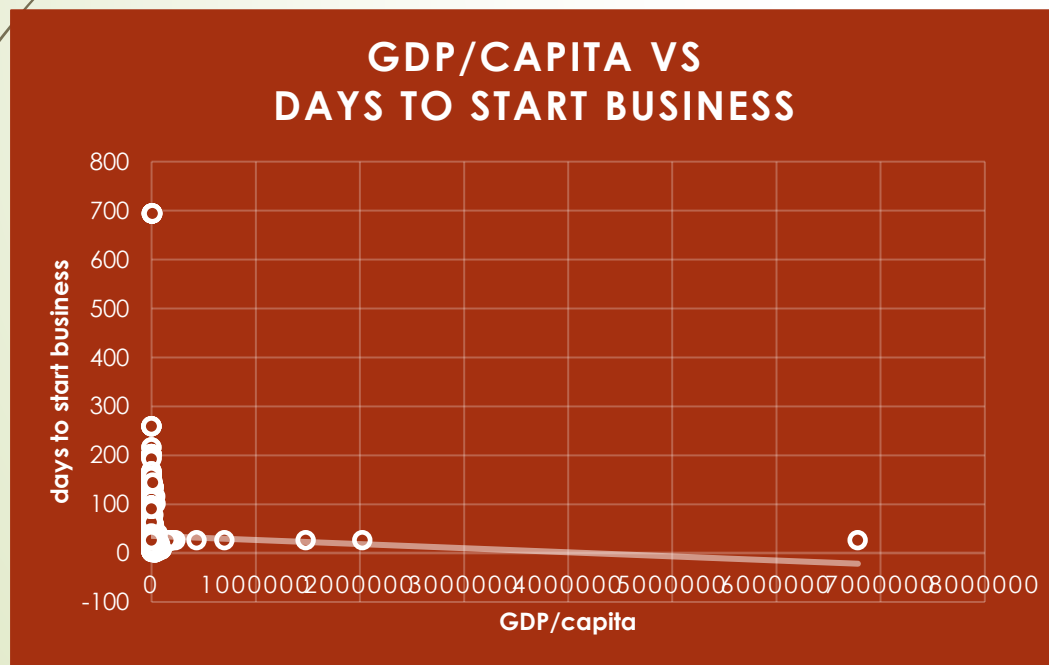

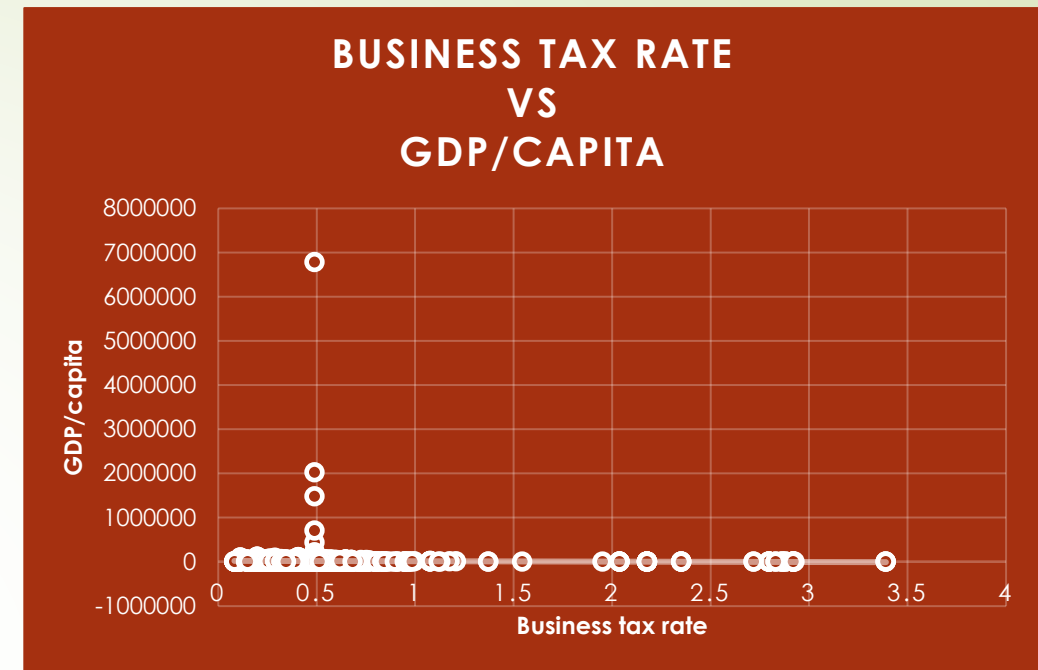

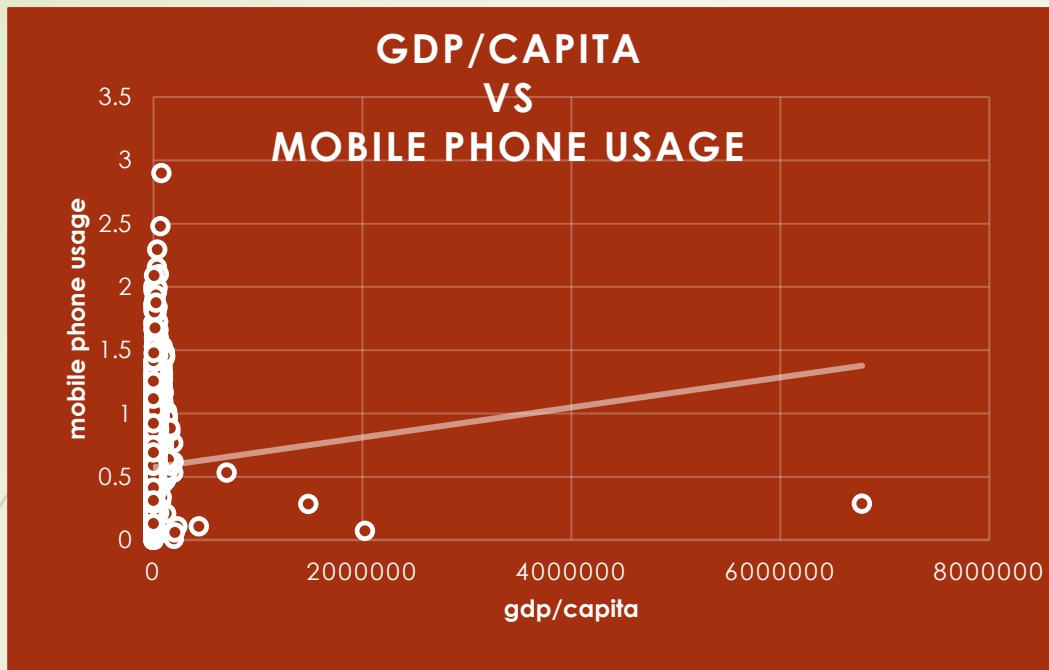

GDP/CAPITA VS POPULATION 15-64

GDP/CAPITA VS POPULATION URBAN

THANK YOU
